

VIRA DAMAYANTI

Software Developer

DKI Jakarta | +6281320918502 (WhatsApp) | viradamayanti56@gmail.com | Portfolio: viradm334.github.io

ABOUT ME

Software Developer with 1.5+ years of professional experience designing, building, and maintaining production web applications and backend services, with a Bachelor's degree in Information Systems (GPA 3.90/4.00). Solid foundation in software engineering principles, **OOP**, data structures, and algorithms, applied daily in **PHP (Laravel, CodeIgniter4)** and **JavaScript**, with supplementary experience in **Go** and **React/Next.js**. Experienced with relational and non-relational databases (**PostgreSQL, MySQL, MongoDB**), **RESTful API** design and documentation, **Git** version control, and **CI/CD** pipelines (GitLab CI, Docker/Podman). Works across the full **SDLC** and has worked in an **Agile/Scrum** team (daily stand-ups and regular discussions with the PM and stakeholders), from requirements analysis (BPMN/UML) to deployment, production monitoring, incident investigation, and root-cause analysis. Uses **AI-assisted development tools** (GitHub Copilot, ChatGPT, Claude) to improve engineering productivity. Communicates effectively in **English** (TOEFL ITP 607), working directly with a UK-based client, and eager to keep learning new technologies.

EXPERIENCE

Backend Developer | College Contract Management UK

Nov 2025 – Present

- Designed, developed, and maintained production applications and backend services (CRM, live chat service, client portal) using **PHP/Laravel** and CodeIgniter4, working directly with a UK-based client to translate business requirements into software solutions.
- Redesigned and rebuilt the CRM from scratch (**Laravel, PostgreSQL, Typesense**) after the previous design proved unstable, covering custom fields, pipeline management, bulk operations, and streaming CSV exports.
- Designed and documented **RESTful APIs**, and integrated third-party services including the **Stripe** payment gateway (secure webhook handling) and the Meta Messenger API.
- Optimized performance and scalability: reduced Redis CPU usage from 50% to 0.4% on the CRM, and cut a 50,000-record pagination flow from 30s to 500ms (98% faster) on a CodeIgniter4 portal.
- Monitored production health and led incident investigation and root-cause analysis: resolved a live outage, mitigated a DDoS attack via UFW firewall rules, and diagnosed AWS EC2 CPU-credit depletion caused by daily peak load.
- Built and maintained **CI/CD** deployment pipelines with **GitLab CI** and **Docker/Podman**, and migrated a production application to a self-managed Linux server with zero data loss.

Backend Developer Intern | Plato.id

Sep 2025 – Dec 2025

- Designed a MySQL/PostgreSQL database schema to support new system features, with scalability in mind.
- Developed and secured RESTful APIs, including Google sign-in (OAuth 2.0) and JWT-based authentication.
- Rebuilt a fixed-duration subscription system into a flexible one, integrated with the Xendit payment gateway.
- Worked in an **Agile/Scrum** team: joined daily stand-ups and regular discussions with teammates, the project manager, and stakeholders to share progress, give feedback, and resolve blockers.

Web Developer | Telkom University

Jul 2024 – Nov 2024

- Developed an adaptive learning website for 200 college students using PHP/Laravel, with a recommendation feature based on cosine similarity to match students with relevant practice problems.
- Configured and deployed the application on a Linux-based Virtual Private Server (VPS), including SSL certificate setup.

System Analyst Intern | Diskominfo Kota Bandung

Jul 2023 – Sep 2023

- Analyzed business requirements and prepared software design documentation using BPMN and UML.

EDUCATION

Bachelor of Information Systems | Telkom University

2020 – 2024

- GPA 3.90/4.00. Specialization in Web Application Development.

Fullstack Developer Bootcamp | Generation Girl Bandung

Nov 2024 – Dec 2024

- Learned Node.js, Express.js, MongoDB, HTML, CSS, and JavaScript.

Belajar Bekerja Bootcamp – Web Developer Specialist | LuarSekolah

May 2025 – Dec 2025

- 6-month intensive job connector program; built Havenwear, an e-commerce application, as the final project.

SKILLS

- Languages:** PHP (OOP), JavaScript, SQL, HTML/CSS; Go (supplementary)
- Frameworks:** Laravel, CodeIgniter4 (MVC); React/Next.js, Node.js/Express (supplementary)

- **Databases:** PostgreSQL, MySQL, MongoDB, Redis, Typesense
- **API & Security:** RESTful API design and documentation, OAuth 2.0, JWT, SQL injection/XSS/CSRF protection
- **DevOps & Tools:** Git (GitHub/GitLab), GitLab CI/CD, Docker/Podman, Linux, Nginx, AWS (EC2, S3), Postman
- **Methodology:** SDLC, Agile/Scrum (daily stand-ups, feedback and blocker discussions), Extreme Programming (applied in published research), requirements analysis (BPMN, UML)
- **AI-assisted development:** ChatGPT, Claude
- **Other:** Analytical problem solving, cross-functional collaboration, technical documentation, English (TOEFL ITP 607)

CERTIFICATIONS

- **Certified Web Developer | BNSP** — 2024 - 2027 (Laravel, MySQL, HTML, CSS)
- **Azure Data Scientist Associate | Microsoft** — 2025
- **TOEFL ITP (Score 607) | Englishvit** — 2025
- **The Complete JavaScript Course 2025 | Udemy** — 2025
